SUMMARY

Results-driven Computer Science graduate with strong experience in graphic design, web development, and Android application development. Successfully completed multiple real-world projects across web and graphic design roles, delivering production-ready solutions for clients and organizations. Final Year Project involved practical implementation of Machine Learning, Artificial Intelligence, Flutter, and Dart to build an intelligent, user-centric mobile application.

EXPERIENCE

Web Architect

AACE (Alumination)

Sep 2024 – Present

- Developed multiple responsive websites and web applications
- Built portfolio, informational, e-commerce, and POS systems
- Used HTML, CSS, Bootstrap, JavaScript, and WordPress.
- Engineered modular site architectures that supported seamless navigation, scalability, and rapid deployment across diverse digital projects.
- Integrated advanced caching mechanisms and content delivery networks to accelerate site responsiveness and support high-traffic demands for diverse client projects.

Graphic Designer (Full-Time / Freelance)

July 2023 – Present

- Completed numerous graphic design projects including branding assets, social media campaigns, vinyl covers, and marketing materials
- Delivered end-to-end design solutions for local and international clients
- Utilized Adobe Photoshop, Illustrator, Adobe XD, and Figma
- Ensured brand consistency and professional design standards.

Graphic Designer

Fiverr

June 2022 – Present - January 2026

- Delivered multiple freelance projects for international clients
- Managed complete project lifecycle independently.
- Developed custom visual assets tailored to diverse client requirements, ensuring cohesive branding and enhancing digital and print campaign impact.
- Executed cohesive branding strategies by designing logos, social media graphics, and marketing collateral for a diverse global client base, ensuring visual consistency across platforms.
- Produced tailored design solutions by interpreting client briefs, incorporating feedback, and consistently delivering high-impact visuals aligned with evolving project objectives.

Design Architect

AACE (Alumination)

January 2024 - August 2024

- Planned and executed UI/UX architectures for web platforms

- Designed structured design systems and responsive layouts.
- Engineered interactive prototypes and visual documentation to communicate design concepts and user flows across multidisciplinary teams.
- Refined user journey flows by integrating accessibility standards and usability testing feedback, elevating consistency and effectiveness across multiple digital touchpoints.

Graphic Design Intern

AACE (Alumination)

July 2023 – December 2023

- Contributed to multiple UI/UX and branding projects
- Designed responsive website components aligned with modern UI standards.
- Produced digital assets for social media campaigns by adhering to brand guidelines and collaborating closely with marketing and design teams.
- Supported brand consistency by implementing feedback from senior designers and refining visual assets across print and digital channels.

PROJECT

AI-Powered Digital Wardrobe & Outfit Planner App

Comsats University Islamabad

- Developed a mobile application using Flutter and Dart.
- Implemented Machine Learning and Artificial Intelligence for outfit recommendations.
- Automated clothing matching based on mood, occasion, and season.
- Integrated fabric care advisory and laundry tracking features.

EDUCATION

Bachelor of Science in Computer Science

COMSATS University Islamabad • 2022 – 2026 • 3.75

Intermediate of Computer Science

Punjab Group of Colleges, Lahore • 2018 – 2020

Adobe Certified Associate in Graphic Design & Illustration Using Adobe Illustrator

Udemy • 2025

Flutter & Dart – The Complete Guide

Udemy • 2025

SKILLS

C, C++, Java, Python, Flutter, Dart

Machine Learning fundamentals, AI-based recommendation systems

HTML, CSS, JavaScript, Bootstrap, WordPress

Adobe Photoshop, Illustrator, Adobe XD, Figma

English (Professional), Urdu (Native)
